

Amended claims

1. Pharmaceutical formulation comprising nucleic
5 acids, **characterised in that** the formulation has a
pH-value within the range from pH 6.2 to pH 7.0,
and/or a chloride ion concentration within the
range from 5 to 100 mmol/l and/or provides
nonsteroidal anti-inflammatory drugs with a
10 concentration within the range from 10 to 500
 $\mu\text{mol/l}$.
2. Formulation according to claim 1, wherein the pH
value is 6.5 or 7.0.
- 15 3. Formulation according to claim 1, wherein the
chloride ions have a concentration within the range
from 5 to 50 mmol/l.
- 20 4. Formulation according to any one of the preceding
claims, wherein the chloride ions have a
concentration within the range from 5 to 10 mmol/l.
5. Formulation according to any one of the preceding
25 claims, wherein the nonsteroidal anti-inflammatory
drugs have a concentration within the range from 50
to 250 $\mu\text{mol/l}$.
6. Formulation according to any one of the preceding
30 claims, wherein the nonsteroidal anti-inflammatory
drugs have a concentration of 100 $\mu\text{mol/l}$.

ART 34 AMDT

7. Formulation according to any one of the preceding claims, wherein the nonsteroidal anti-inflammatory drugs are flurbiprofen or indoprofen.
- 5 8. Formulation according to any one of the preceding claims, further comprising carrier substances and additives.

ART 34 AMDT
